

CHILDREN'S VISION QUESTIONNAIRE

The questions below help our doctors understand how your child uses their eyes while they are learning in and out of the classroom. If you are unsure of the answer, ask your child.

DOES YOUR CHILD...	YES	NO
Skip or repeat words/lines when reading?		
Have trouble keeping attention on reading?		
Demonstrate poor reading comprehension?		
Have difficulty copying from the board in class?		
Complain of headaches/eye strain during or after school?		
Report blurry vision, or double vision?		
Still reverse letters, numbers or words (after 1 st grade)?		
Have poor handwriting?		
For Parents:		
Have you heard of Optometric Vision Therapy?		
Have you known anyone that has gone through Vision Therapy?		

Vision is more than 20/20: Did you know that 80% of what a child learns is through their visual system? Seeing clearly is important, but there is so much more to vision than simply seeing 20/20.

Our eyes need to work together to see a single, clear image. This image is then transmitted to the brain where the information is processed and understood. Proper eye teaming, focusing ability, reading eye movements and visual information processing are *essential* for learning.

If one or more of these skills is weak, it can have a tremendous impact on the learning process.

The doctors at Elite Eye Care are assessing all areas of your child's vision. If you have any questions or concerns about their performance in school please let your provider know.

Child's Name _____ Date: _____
