

**Family Optometric Care**

J Brent Meek OD  
Lisa A Kopper OD

We are proud to introduce the latest in retinal imaging, the Optomap. It is painless, quick and the doctor's preferred method at looking at the health of your eye. This instrument will enhance our ability to detect and monitor retinal defects associated with common systemic diseases such as hypertension, diabetes, high cholesterol, and thyroid problems. Through this digital imaging of the retina we can observe early changes in the eye relating to glaucoma, cataracts, and macular degeneration.

**This technology is now our new standard of care.**

By the time you have symptoms affecting your vision it is typically too late to prevent permanent sight damage. We care about your vision and want to be sure we actively monitor your eye; the Optomap retinal image is the best way to do this.

There is a nominal fee of \$39.00 to perform this procedure.
