

# Purposeful Powerful Vision Training

Utilising in-office and home-based activity protocols, the innovative Binovi Platform helps optometric practices gain greater results, faster, with improved patient satisfaction in areas ranging from sports performance to binocular vision abnormalities.

## Binovi Touch

The original Wayne Saccadic Fixator helped to revolutionize the field when it was introduced in the 1970s. Almost 50 years on, we have completely re-imagined the device from the inside out.

Binovi Touch is designed to help patients and athletes improve in all aspects of their key vision skills. Train multiple skills simultaneously, or strip an exercise down to the bare essentials and focus on one key ability at a time.

## Binovi Pro

Get the full Binovi experience with Binovi Pro! Designed as an electronic record-keeping system and home therapy assignment tool, Binovi Pro connects team members to each other, their patients/athletes, and experts in optometry, sports vision, and vision therapy all in one place.

Create and manage profiles; store, review, and analyze Binovi Touch data; create testing, training, and treatment plans for each patient/athlete as their needs and abilities dictate.

## Binovi Coach

Coaches set the gameplan and help keep everyone on track and working together. Binovi Coach connects individual users to their training and treatment teams 24/7.

Use Binovi Coach to stay in touch through Binovi Pro and to assign training exercises and recovery treatment activities to patients and athletes. Binovi Coach is an extension of the trainer's reach and monitoring

## Binovi Kit

Everything you need to get started, all in one package. We've assembled a comprehensive collection of industry-standard materials and equipment to complement home therapy activities.

Binovi Kit is designed to be paired with Binovi Coach and Binovi Pro, as the activities in the apps are listed and demonstrated with the same materials.
