

Hannah Levy's Success Story

I used to always have double vision, blurriness, and really bad headaches during school. We went to the eye doctor so many times but nothing seemed to help. So we went to Vision Development Center to see if they could help me. My experience there was amazing. I noticed improvements very quickly. Towards the end of vision therapy, I finished a chapter book! Which seems easy but before I went to vision therapy, I never read a book because I always got headaches and it was very frustrating. My mom had to read reading assignments to me and it was very aggravating because I was 11 years old, and I felt like I should be able to do that. It just knocked down my confidence. But now I have so much confidence because I don't struggle when I get called on to read in class. Also we worked on motion sickness and I have had improvements for that too. After vision therapy, I can read, see, and focus better than before. Vision therapy has positively changed my life.
